

Convenient Metro Locations

Success Spurs Growth, Opportunity

The success of Institute for Minority Development programs has created a metro-wide demand for its unique services.

Community leaders and families in Minneapolis have experienced the positive effects of the Institute's work in areas such as waiver services, behavioral health and in-home support, and parent and youth leadership training.

The community at large has benefited from the Institute's participation in the Hennepin County Mental Health Collaborative. IMD's staff works with its partners in the collaborative to pull together the resources troubled children and families need give them a chance to succeed.

So it is with great enthusiasm that IMD announces the expansion of its services to communities and families throughout the Twin Cities area. IMD offers:

- Parent Leadership Training
- Anger Management
- Support Groups for children with disabilities
- Medicaid Waiver Services
- Medical Assistance, third party billing

Three Locations

Accessing IMD programming has never been easier. Now with three locations in the metro area, the IMD staff is poised to expand its positive impact on communities and family life across the Twin Cities.
